# Synthesis of “Average” Sinusoidal Voltages

$$v_{aN} = 0.5V_d + \underbrace{\hat{V}_a \sin \omega t}_{v_a}$$

$$d_a = 0.5 + \hat{d}_a \sin \omega t$$

$$\hat{V}_a = \hat{d}_a V_d$$

$$\underbrace{v_{aN}}_{\text{average}} = d_a V_d \quad d_a = \frac{T_{up}}{T_s}$$
